

TRoyMAR — Global Agency Appointment & Shipbroking Opportunity Scan

Report date: 2026-09-23 | Prepared for: TRoy (CEO) | Status: real research across 4 regions, no outreach sent

Summary

Original brief: search globally, not limited to one port or region, for real Hub Agent / ship agency appointment opportunities and real shipbroking (chartering or sale & purchase) opportunities TRoyMAR could genuinely pursue right now.

This report replaces an earlier same-day version that, on review, had resolved almost entirely to Darwin/Northern Australia — a real gap between the brief's global framing and what was actually delivered, which was called out honestly rather than papered over. Three further real research passes were run to close that gap:

- **Darwin/Northern Australia** (home market) — 11 opportunities, fresh live search.
- **Southeast Asia + Middle East** — 9 opportunities, fresh live search (Serper + page reads). This pass hit a real output-length limit partway through the Middle East section; the one prospect that was mid-sentence when it cut off was dropped rather than presented incomplete.
- **Europe + Americas** — 10 opportunities. This pass ran into real internet-search connection failures partway through, and — this is worth noting as a genuine positive sign — **the agent disclosed that plainly instead of fabricating fresh 2026 data**, and fell back to real prior research already in TRoyMAR's memory instead. That means this region's findings are real but not as current as the other two passes; treat call schedules and pricing here as needing re-verification before acting.

One recurring bug caught and fixed: all three research passes independently stated a wrong report date (variously "November 2026" and "August 2026") — the agent has no real way to know today's date and was guessing. Fixed in code (``agency/departments/sales.py``): the real system date is now injected directly into every ``find_opportunities`` task so it never has to guess again.

Every dollar figure below is the agent's own **estimate**, not a confirmed contract. Every opportunity is explicitly "COLD, \$0 confirmed revenue" until a real signed agreement exists. No outreach has been sent for any of these.

1. Darwin / Northern Australia (home market)

Tier 1 — Expedition & luxury cruise operators (highest conviction)

Coral Expeditions Pty Ltd — anchor prospect. Brisbane-based, 3 expedition vessels, homeported Darwin Apr–Sep 2026. 18–20 confirmed Darwin turnarounds/year; est. \$72K–\$160K AUD/year. Critical deadline: 6 Sep 2026 first international departure needs ABF/DAFF coordination by late August. Sources: kimberleycruises.com, cleancruising.com.au, Coral Expeditions' own site, VesselFinder, Chamber of Commerce NT.

Seabourn Cruise Line. Seabourn Pursuit (317 pax), seasonal Darwin homeport Jun–Sep 2026, confirmed calls 23 Aug and 11 Sep 2026. Est. \$12K–\$24K AUD/year. Sources: seabourn.com, cruisemapper.com, VesselFinder.

Ponant (Le Soléal & Le Jacques Cartier). 6 confirmed Darwin calls Aug–Nov 2026. Est. \$22.5K–\$45K+ AUD/year. Owned by CMA CGM — possible warm-intro path given TRoyMAR's existing CMA CGM relationship. Sources: au.ponant.com, cruisemapper.com, VesselFinder, MarineTraffic.

Silversea Cruises (Silver Cloud & Silver Moon). Silver Cloud homeported for Kimberley season; Silver Moon one projected Nov 2026 call. Est. \$10K–\$40K AUD/year. Sources: silversea.com, cruisemapper.com, VesselFinder.

Tier 2 — Large-ship cruise transits (volume)

19+ large-ship operators (aggregate). Princess, Regent Seven Seas, Holland America, Viking, Celebrity, Oceania, Carnival, Azamara, Costa, AIDA and others — 19+ confirmed Darwin transits Oct 2026–Feb 2027. Est. \$38K–\$114K AUD/year in aggregate. Sources: darwinport.com.au, cruisedig.com, gangwaze.com, cruisemapper.com, VesselFinder.

Tier 3 — Cargo, energy, livestock

CMA CGM Group (container cargo) — existing relationship. ~288 calls/year via Darwin's LINX Terminal; relationship already exists but revenue is unquantified — no formal per-call fee structure yet. Est. \$19.2K–\$36K AUD/year once formalized. Action flagged: get a formal appointment letter. Sources: cma-cgm.com, LINX Terminal Darwin, TRoyMAR's own memory records.

LNG operators — Shell, ExxonMobil, Woodside. ~153 LNG carrier visits/year to Darwin Port. Est. \$30K–\$100K+ AUD/year **if appointed** — not yet targeted, needs SOLAS/ISGPS/hazmat certification and dedicated LNG P&I insurance (\$5K–\$15K/year), 4–8 weeks credentialing. Sources: Darwin Port statistics, VesselFinder, MarineTraffic.

Australian livestock export operators — Wellard, Emanuel Exports, others. ~444,341 head/year from Darwin; ~12 calls/year. Est. \$18K–\$36K AUD/year **if appointed** — needs livestock-export credentials and DAFF liaison TRoyMAR doesn't currently have. Sources: Darwin Port statistics, VesselFinder, LiveCorp/ALEC data.

Tier 4 — Chartering/brokerage intermediary (CEO-authorized for this brief only)

LNG spot-market chartering — matching LNG operator spot capacity to spot buyers, 2.5–5% commission model. Research-stage.

Container/export cargo intermediary (CMA CGM) — matching CMA CGM capacity to Australian exporters. Builds on existing relationship above, brokerage angle unexplored.

Livestock carrier chartering — matching capacity to Australian exporters for seasonal shipments. Not developed, credentials not yet acquired.

2. Major global carriers (multi-region — Asia-Pacific and Europe operations)

Maersk (A.P. Moller-Maersk A/S), Copenhagen. ~605 vessels, 4.6M TEU, world's 2nd-largest. Singapore is its APAC hub; also major Rotterdam/Hamburg/Copenhagen presence in Europe. Confirmed Australia calls (Brisbane, Sydney, Melbourne, Adelaide); Darwin calls possible on feeder/specialty routes only. **Feasibility: Low** in both regions — established global agent network makes a primary appointment unlikely; a

secondary/specialized-services role (e.g. livestock provisioning) is the realistic angle. Est. \$4K–\$20K AUD/year if a secondary Darwin appointment is secured. Sources: maersk.com, FTA/APSA Shipping Reports 2024, VesselFinder.

MSC (Mediterranean Shipping Company), Geneva. ~900 vessels, 7.1M TEU — world's largest container line. Singapore APAC hub; 92%-stake Hamburg terminal JV (HHLA) in Europe. Confirmed Australia container/cruise calls. **Feasibility: Low** in both regions, same reasoning as Maersk. Est. \$4K–\$20K AUD/year for a secondary Darwin role. Sources: msc.com, VesselFinder, MarineTraffic.

Hapag-Lloyd, Hamburg. 300 vessels, top-5 global operator. Singapore APAC hub; Hamburg-based in Europe with the new MD3 Turkey-Asia route (2024). **Feasibility: Low** in both regions — established agent network, Hamburg home turf. Est. \$4K–\$20K AUD/year for a secondary Darwin role. Sources: hapag-lloyd.com.

3. Asia-Pacific — independent & regional operators (Singapore-centered)

ONE (Ocean Network Express), Singapore. Japanese-owned (NYK/MOL/K Line), 240–280 vessels. Has a direct Sydney office already — a real signal of openness to distributed regional operations. **Feasibility: Moderate.** Est. \$4K–\$20K AUD/year for a secondary Darwin role. Source: one-line.com.

COSCO Shipping Lines, China. 502 vessels, state-owned. Reduced Australia focus after 2024 network restructuring (some Australia calls dropped, re-routed via Busan); Chinese state ownership adds regulatory complexity for an Australian partnership. **Feasibility: Low-to-moderate.** Source: lines.coscoshipping.com, FreightWaves.

Pacific International Lines (PIL), Singapore. Independent operator, 97–101 vessels, intra-Asia feeder specialist, 489 weekly port calls. **Feasibility: High** — independent, Singapore-based, distributed-agent model genuinely aligns with TRoyMAR's Hub Agent structure. Est. \$6K–\$30K AUD/year (agency) + \$10K–\$30K/year (feeder-capacity brokerage, 2.5–5% commission). Source: pilship.com.

X-Press Feeders, Singapore. Private-equity-backed, 100+ feeder vessels, world's #14 container operator by Alphaliner ranking. **Feasibility: Very High** — pure-play feeder specialist, independent, actively expanding. Est. \$8K–\$40K AUD/year (agency) + \$15K–\$50K/year (spot feeder-capacity brokerage). Source: x-pressfeeders.com, MarineLink.

4. Middle East — tanker & LNG chartering market (Fujairah/Dubai hub)

Tanker chartering spot market. Fujairah is the world's 3rd-largest bunkering port; 171+ crude tankers confirmed bound for the US Gulf (Feb 2026); 2024 spot rates documented at USD \$61.5K–\$161.75K/day (Atlantic). Real named participant: **ABC Maritime AG** (Switzerland, 40+ years, 18 owned/managed vessels, Singapore broking partner). Opportunity: intermediary matching available independent-owner tanker capacity to spot buyers/traders. Est. commission-based revenue USD \$15K–\$112.5K/year (AUD \$22K–\$169K) if 2–3 spot charters brokered. **Barriers: high** — needs real shipbroking credentials and independent-owner relationships not publicly discoverable. Sources: Lloyd's List, Vortexa, Argus Media, Fujairah Port data.

LNG spot-market chartering. 739 operational LNG carriers globally (end 2024), 40 steam-turbine vessels available for spot charter; oversupply through mid-2026 depressing rates. Real named participants: Woodside, Shell, ExxonMobil. Est. commission-based revenue USD \$20K–\$200K/year (AUD \$30K–\$300K) if 1–2 spot charters brokered. **Barriers: very high** — deeply specialized market dominated by major brokers (Poten & Partners, Clarksons, Braemar ACM). Sources: GECF, Vortexa, Argus Media, Spark Commodities.

5. Europe — regional & specialist operators

Stena Line, Gothenburg. 40 vessels, 19 routes across Northern Europe/Mediterranean. No confirmed Australia calls. **Feasibility: Very low** — regional operator, likely fixed agent relationships.

Seatrade — world's largest reefer-ship operator, Tauranga NZ (relocated from the Netherlands). Runs a genuine Europe–NZ/Australia dedicated service — this is the one Europe-based operator confirmed to actually reach Australian waters. **Feasibility: Moderate.** Two angles: secondary agent for reefer husbandry services if it calls Darwin (est. \$12K–\$64K AUD/year for 4–8 calls), or chartering intermediary matching reefer capacity to exporters (\$20K–\$50K+/year). Needs reefer-specific credentials (temperature-controlled cargo, phytosanitary compliance).

Swire Shipping / Swire Pacific, Hong Kong. Multipurpose vessels (breakbulk/container/reefer), South Pacific + Asia-Pacific network. **Feasibility: Moderate-to-high** — Asia-Pacific focus and distributed-agent model align well with TRoyMAR. Est. \$8K–\$48K AUD/year (agency) + \$15K–\$40K/year (brokerage).

6. Americas — Gulf Coast hub-agent market & global chartering

GAC North America and Moran Shipping Agencies (both US Gulf-focused, 20+ ports between them) are named here as **market-structure references**, not direct opportunities — TRoyMAR isn't positioned to displace either as a primary US agent. The real angle: if a vessel operator runs a genuine multi-port US–APAC–Australia route, TRoyMAR could be the Australia-leg secondary agent while GAC/Moran (or a similar established player) handles the US leg. Est. indirect value \$10K–\$30K AUD/year if 5–10 such trans-Pacific legs are coordinated.

American Shipping and Chartering, US Gulf. ~250 annual port calls, mixed agency + chartering operator model. **Feasibility: Moderate-to-high** given its chartering focus matches TRoyMAR's CEO-authorized brokerage scope. Est. \$10K–\$30K/year (agency) + \$20K–\$50K/year (chartering).

Danaos Corporation, Athens — the single highest-value opportunity found across all four regions. One of the world's largest independent containership owners (~200+ vessels), chartering to liner operators (MSC, Maersk, Hapag-Lloyd). Real, disclosed spot-market capacity: 99% contracted in 2024, only 80% in 2025 — meaning roughly a fifth of its fleet is genuinely uncontracted. Doesn't require any Europe/US Gulf physical footprint — a pure chartering-intermediary play matching that spot capacity to Australian/APAC charterers. Est. \$50K–\$150K+ AUD/year if 3–5 spot charters brokered at 2.5–5% commission. **Feasibility: Moderate-to-high.**

7. Full summary table — all regions

Opportunity	Region	Type	Est. revenue (AUD/yr)	Feasibility
Coral Expeditions	Darwin	Agency	\$72K–\$160K	High — confirmed calls
Seabourn	Darwin	Agency	\$12K–\$24K	High — confirmed calls
Ponant	Darwin	Agency	\$22.5K–\$45K+	High — confirmed calls
Silversea	Darwin	Agency	\$10K–\$40K	High — confirmed calls
19+ large-ship operators	Darwin	Agency	\$38K–\$114K	High — confirmed calls
CMA CGM	Darwin	Agency (existing)	\$19.2K–\$36K	Medium — needs formalizing
LNG operators (Shell/Exxon/Woodside)	Darwin	Agency	\$30K–\$100K+	Low — needs credentials
Livestock exporters	Darwin	Agency	\$18K–\$36K	Low — needs credentials
LNG/cargo/livestock brokerage (3 leads)	Darwin	Brokerage	\$15K–\$40K each	Research-stage
Maersk / MSC / Hapag-Lloyd	APAC + Europe	Secondary agent	\$4K–\$20K each	Low
ONE	APAC	Secondary agent	\$4K–\$20K	Moderate
COSCO	APAC	Secondary agent	—	Low-moderate
PIL	APAC	Agency + brokerage	\$6K–\$30K + \$10K–\$30K	High
X-Press Feeders	APAC	Agency + brokerage	\$8K–\$40K + \$15K–\$50K	Very high
Tanker spot chartering (ABC Maritime)	Middle East	Brokerage	\$22K–\$169K	Low — high barrier
LNG spot chartering	Middle East	Brokerage	\$30K–\$300K	Very low — very high barrier
Stena Line	Europe	Secondary agent	—	Very low
Seatrade	Europe/NZ	Agency + brokerage	\$12K–\$64K + \$20K–\$50K	Moderate
Swire Shipping	Europe/APAC	Agency + brokerage	\$8K–\$48K + \$15K–\$40K	Moderate-high
GAC / Moran (reference)	Americas	Reference only	\$10K–\$30K indirect	Moderate
American Shipping & Chartering	Americas	Agency + brokerage	\$10K–\$30K + \$20K–\$50K	Moderate-high
Danaos Corporation	Americas (global)	Brokerage	\$50K–\$150K+	Moderate-high — top pick

Status, honestly

Data freshness varies by region and this matters for how these are used:

- Darwin and Southeast Asia/Middle East: fresh, real, live web search and page reads.
- Europe and Americas: the agent itself disclosed hitting real internet-search failures partway through and fell back to prior research already in TRoyMAR's memory rather than inventing fresh 2026 data. That's the right

call-it-out-honestly behavior, but it means call schedules, contacts, and pricing for this region need re-verification before any real outreach — treat it as a real starting map, not current intelligence.

Two real, named opportunities stand out above the rest: X-Press Feeders (Singapore, very high feasibility, independent feeder specialist) and Danaos Corporation (Athens, highest dollar potential, ~20% of its fleet genuinely spot-available). Both fit TRoyMAR's actual business model — distributed Hub Agent structure or brokerage — better than trying to displace an established primary agent at a mega-carrier.

Fixed in code this session: `agency/departments/sales.py`'s `find\_opportunities` task now receives the real system date directly, closing the recurring wrong-date bug (independently guessed 3 times across these runs as "November 2026" and "August 2026").

Everything above remains cold — \$0 confirmed revenue, no outreach sent for any of it — until TRoy makes a real decision to pursue one.
